

PRESS RELEASE - October 25th 2021

Night Sky X - (Part Two)

Celebrating 10 years of Night Sky!

Night Sky - the worlds most famous stargazing app, is celebrating its 10th year with **2 major updates!** In **Night Sky X (Part Two)**, the app builds on all of the major stargazing breakthroughs introduced last month by revolutionizing how we view the sky together, with **Connected Stargazing!**

In addition we've introduced **Sky Timestamps** in this update, to save the sky for your favourite dates whether it be the sky for the night you were born, or the sky on the night of a major celestial event.

WHAT ARE THESE THINGS?

+ **CONNECTED STARGAZING** - Stargaze with others using **Connected Stargazing** with **SharePlay!** Start a **FaceTime Audio** call, then stargaze together in real time! Night Sky lets others in your group know when you've found an object! Someone can host, or you can all collaborate, adding stars, planets, constellations and satellites to the session in **real time!** A revolutionary new feature allowing you to **stargaze together even when you're physically apart.***

(*Night Sky Premium subscribers only. iOS/iPadOS 15.1 or newer, or macOS Monterey or newer required. FaceTime Audio recommended.)

+ **SKY TIMESTAMPS** - Travel to anytime in the past or future using the Space Travel feature, then Sky Timestamp the time for quick recollection! Save the sky for the night you were born, or any other significant celestial event to revisit at the tap of your Sky Timestamp!

"**10 years ago** I created a simple app in my childhood bedroom and called it **Night Sky**. I could never have imagined at the time, how Night Sky would have such a **reaching impact on astronomy education** around the globe. We're **celebrating its 10th anniversary** with **2 major innovative updates** this year. Welcome to our most **personal version yet - Night Sky X!**"

- Andy Weekes, Founder & Company Director, iCandi Apps.

iCandi Apps was founded in 2008 by Andy Weekes, after he was inspired by the introduction of the App Store by Steve Jobs. Andy went from being a school teacher to creating one of the most successful reference apps in the world. Over the past 10 years the team has grown and made the most popular astronomy app in the world, having a reaching and meaningful impact on astronomy education around the globe.

Night Sky X (Part Two) is available to download for iOS, iPadOS, watchOS, and tvOS on the App Store from October 25th 2021 -
