

## PRESS RELEASE - September 15th 2024

### Night Sky 26

#### Introducing Aura, Your Personal AI Super Astronomer!

September 15th, 2025 — iCandi Apps is thrilled to announce Night Sky 26, the latest version of Night Sky, featuring new advanced AI with **Night Sky Aura** - Your Personal AI Super Astronomer - and a visually stunning new **Liquid Glass Design**.

#### FEATURE SET:

##### **Night Sky Aura** (Night Sky + Aura Subscription required)

The next evolution in interactive stargazing. Night Sky Aura combines real-time astronomical data with conversational AI, allowing users to explore the Night Sky by asking questions and getting instant, intelligent responses. Whether it's identifying constellations, understanding celestial events, or learning about distant planets, Aura brings the universe to life as it's deeply integrated with Night Sky's existing feature set. It's like having your own Personal AI Super Astronomer in your pocket!

##### **Liquid Glass Design**

A visually breathtaking UI overhaul designed for iOS/iPadOS, macOS, visionOS and tvOS 26. With smoother transitions, crystal-clear glass-like overlays, and refined visuals that elegantly reflect light and motion. Every screen - from the main menu to the sky widgets, now feels more fluid whilst revealing more of the beautiful sky map behind.

##### **New Liquid Glass Icon**

The iconic Night Sky icon has been redesigned in Liquid Glass.

##### **New Version Number Convention**

Night Sky 26 marks the first move to year aligned version numbers to link Night Sky updates to the year they are released.

---

**"Night Sky Aura unlocks a new era of stargazing** - where the universe isn't just observed, it's understood. By **fusing advanced AI** with the vast array of features in Night Sky, we've created your own **Personal AI Super Astronomer** - making the cosmos more **accessible, insightful, and inspiring than ever before!**"

- Andy Weekes, Founder & Company Director, iCandi Apps.

---

iCandi Apps was founded in 2008 by Andy Weekes, after he was inspired by the introduction of the App Store by Steve Jobs. Andy went from being a school teacher to creating one of the most successful reference apps in the world. Over the past 14 years the team has grown and made the most popular astronomy app in the world, having a reaching and meaningful impact on astronomy education around the globe.

Night Sky 26 is available to download for iOS, iPadOS, visionOS, watchOS, and tvOS on the App Store from September 15th 2024 -
